

# WALL HUNG DRINKING FOUNTAIN

including bottle filler

The Franke Sissons Wall hung Drinking Fountain with bottle filler is ideal for schools and colleges where the drinking of water has been shown to improve levels of concentration in students and increase academic achievement.

The compact drinking fountain incorporates a water bubbler and a bottle filler to save space in busy corridors and washrooms.

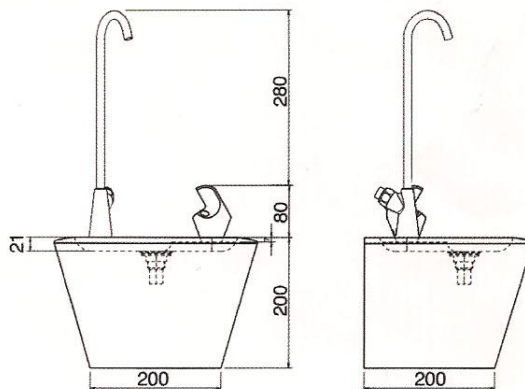

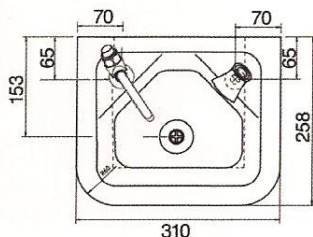

Drinking water fountains are manufactured from grade 304 grade stainless steel, material thickness 1.2mm, supplied complete with 19mm waste and water bubbler tap. The wall mounted model is simply fixed to the wall using a joggle strip and integral mounting brackets.

## Dimensions

310mm x 258mm x 200mm
